This is a latin square puzzle that can be solved using logic principles similar to those used in solving sudoku puzzles, but lacking the internal sub-squares of sudoku. Once solved it reveals a full width inscription answering the question in the title. The solved puzzle can also be approached as a word search puzzle. Words could be horizontal, vertical, diagonal, and backwards. Some terms may be found to relate to the theme of this puzzle.

This is a fillable form when using compatible readers. It does not validate whether your entries are within the allowed symbol set, and it does not confirm whether or not you have completed the puzzle correctly.
